UMSD Clinic Cubicle Check List to Prepare the Cubicle for Patient Care

Step 1
APPROPRIATE PERSONAL PROTECTIVE EQUIPMENT (PPE) MUST BE WORN TO INCLUDE:
• clean clinic coat (clinic coat must be worn over scrubs)
• safety glasses with side shields
• gloves
• appropriate footwear
All providers must adhere to the Appearance Guidelines in the UMSD Clinic Procedure Reference Manual.

Step 2
USE CLOROX DISINFECTANT SPRAY TO PRE-CLEAN:
• counter-top
• dental chair
• operator stool back and seat
• assistant stool back and seat
Then spray these surfaces again and let the disinfectant sit for 3 minutes.

Step 3
USE CLOROX DISINFECTANT SPRAY TO PRE-CLEAN:
• view box power button
• operator stool height adjustment control lever and legs
• assistant stool height adjustment control lever and foot rest ring
• light handles and light pole (do not use disinfectant to clean the light shield)
• touch pad
• all air, water, suction cords and connectors
• bracket tray and handles
• dental chair power switch
Then wipe these surfaces again and let the disinfectant sit for 3 minutes.

Step 4
PURGING HANDPIECE AND AIR/WATER SYRINGE LINES:
• verify dental unit bottle is filled with H2Pro
• turn on dental unit power switch
• remove high speed line from its holder
• remove air/water syringe line from its holder
• place high speed line and air/water syringe line over sink
• depress purge button located next to dental unit power switch for 15 seconds (water will begin to come out of high speed connector)
• depress water button on air/water syringe and express water for 15 seconds
• once the lines are purged you may connect the fiber optic high speed hand piece

Step 5
USE BLUE BARRIER WRAP ON:
• operator stool height adjustment control lever
• assistant stool height adjustment control lever
• light handles
• touch pad
• bracket tray handles
• computer mouse

Before Barriers

Step 6
USE PAPER BARRIERS ON:
• 7 long papers on counter top
• 1 small paper for bracket tray
• 1 headrest cover
• 1 blue patient napkin

After Barriers

Step 7
USE PLASTIC BARRIERS ON:
• sleeve over high volume suction (secure with an ortho elastic)
• sleeve over saliva ejector (secure with an ortho elastic)
• 1 keyboard cover

Step 8
APPROPRIATE PERSONAL PROTECTIVE EQUIPMENT (PPE) MUST BE WORN TO INCLUDE:
• clean clinic coat
• safety glasses with side shields
• gloves
• appropriate footwear
All providers must adhere to the Appearance Guidelines in the UMSD Clinic Procedure Reference Manual.
