Do you suffer from chronic Trigeminal Neuropathic Pain (TNP)?

Volunteers needed for a 2-month research study using Magnetic Resonance Imaging (MRI) and Positron Emission Tomography (PET) imaging as well as non-invasive brain stimulation (tDCS) in people who suffer from chronic Trigeminal Neuropathic Pain (TNP) and in healthy controls to identify factors that may be associated with chronic pain in patients with TNP.

Major Inclusion Criteria:
- Age 18-65
- Good general health
- Suffer from daily chronic Trigeminal Neuropathic Pain (TNP) for at least 6 months
- Unilateral pain

Participation Involves:
- 1 MRI brain scan, of approximately 2 hours each
- 2 PET scans with tDCS sessions, of approximately 2 hours each
- Compensation of $25 per half hour participation.
