Coughlin Family Gift Establishes Craniofacial Anomalies Fellowship
Will Fund First of its Kind Program in the Country

A family experience…the passion of Dr. Katherine Kelly for identifying an exceptional cause to support. I believe in our orthodontic practice in Pune and taught Craniofacial Surgery, Edinburgh, UK. After conducting his fellowship, he joined the Chennai Government Dental College to earn a master’s degree in Orthodontics and Craniofacial Surgery. Dr. Anshuman Soni, is a general dentist in Northern California while he looks for a private practice in Clinton Township, Michigan and cannot wait to finally being back home in Michigan. His wife, Kim, Kody, Mollie, and Madi have their eyes set on finally owning a home.

Dr. Scott Behnan

Dr. Scott Behnan was born and raised in Hattiesburg, Mississippi. As a child, he attended Pennsylvania State University where he received his B.S. in biology with a concentration in Environmental Biology in 2005. He then joined the University of North Carolina where he earned his D.D.S. degree in 2008. He completed his undergraduate dental education in Hattiesburg, Mississippi where he received his B.S. in Chemistry in 2004. In 2008, he graduated Boston University School of Medicine in Boston, MA where he received his Ph.D. in 2007. He has been awarded the national and international fellowships and awards in the field of orthodontics.

Dr. Scott Behnan plans to join the Michael Goldman Sachs.

Dr. Matt Lindberger was born in New York, NY, and spent most of his childhood in the New York financial district. He has attended Pennsylvania State University for two years before moving to the University of North Carolina where he earned his D.D.S. degree in 2008. He completed his undergraduate education at the Massachusetts Institute of Technology in 2006. He is now practicing in New York city.

Dr. Devin Johnson has been named and appointed to the School of Dentistry’s Board of Overseers. Dr. Johnson is a graduate of the University of North Dakota and completed his orthodontic residency at Michigan State University. Dr. Johnson is currently serving as the Vice Chair of the Board of Overseers. A gift from the Michael and Suzi Goldman Sachs will establish a new craniofacial anomalies fellowship. When established, the fellowship will be the first of its kind in the country.

Dr. James Moses was born and raised in Hartford, Mississippi. As a child, he attended Pennsylvania State University where he received his B.S. in Biology with a concentration in Environmental Biology in 2005. He then joined the University of North Carolina where he earned his D.D.S. degree in 2008. He completed his undergraduate education at the Massachusetts Institute of Technology in 2006. He is now practicing in New York city.

Jim Harris Collegiate Professorship Endowment is Fully Funded and Receives Regental Approval

A major endowment that was initiated Dec. 8 by Dean Smith and Pierre Timlin was officially announced on Feb. 28. The endowment is designed to support the James A. Harris Collegiate Professorship in the Department of Orthodontics. The fund will provide an annual salary and required office and travel expenses for a professor who will be dedicated to advancing the field of orthodontics and serving the dental community.

The endowment was established by the late Dr. James A. Harris, a former department chairman and dean of the dental school, to honor his alma mater and his alma mater’s orthodontic department. It is the largest endowment ever established at the University of Michigan School of Dentistry.

The endowment was announced as a result of a successful campaign to raise funds for the department, which has received a total of $4 million in contributions over the past several years. The campaign was launched in 2004 and has exceeded its $4 million goal.

Sponsorship for the biennial meeting along with the department’s mixers that attract current and former residents and faculty members.

Dr. James A. Harris’ background and achievements earned him a national and high profile of the reasons for this well-deserved recognition. He is a protégé of Anna Fish and the University of Michigan. He was born and raised in Michigan, and attended the University of Michigan for his undergraduate and dental education before taking a short break to join the Navy. While in the Navy, he was the dentist on a guided-missile submarine. His deep connection with the Navy is evident in his service and his family. He served in the Navy from 1957 to 1960 and then joined the Michigan Department of Public Health, where he served as a public health officer.

It is a pleasure to greet all of you with this most recent accomplishment and to celebrate the many contributions of Dr. James A. Harris to the dental profession.

The endowment will be used to support the University of Michigan’s Craniofacial Awareness Month. Senator John Gleason (D-Flushing) sponsored Senate Resolution No. 147 designating February, 2008 as Craniofacial Awareness Month. Craniofacial Awareness Month, while Saydee (far left), her family and friends, and Dr. Katherine Kelly (standing far right) look on.

Craniofacial Awareness Month is a time to raise awareness about craniofacial anomalies and to promote the health and well-being of individuals with craniofacial anomalies. The purpose of Craniofacial Awareness Month is to increase public awareness and understanding of craniofacial anomalies and to promote research and education in craniofacial and special care orthodontics.

The University of Michigan Craniofacial and Special Care Orthodontics program is a nationally recognized program that provides comprehensive care for patients with craniofacial anomalies. The program is located at the University of Michigan School of Dentistry and is one of the few programs in the country that specializes in the care of children and adults with craniofacial anomalies.

The program is led by Dr. James E. Harris, who is a professor of orthodontics and pediatric dentistry and the department chair. Dr. Harris is a national and international expert in craniofacial and special care orthodontics.

The program is housed in the Michigan Department of Health and Human Services, and it is supported by the Michigan Department of Commerce and the Michigan Department of Education. The program is also supported by the Michigan Department of Public Health, the Michigan Department of Community Health, and the Michigan Department of Education.
